

## Paxar® 610™/611™/612™ Care Label Printers

### Paxar® 610™/611™/612™ Care Label Printers

**Print Technology** .....Thermal transfer  
 .....Paxar 610/611 - One side printing 1/0  
 .....Paxar 612 - Two side printing 1/1 with turnbar

**Stocks** .....Thermal transfer coated polyester fabrics  
 .....Thermal transfer pearlescent coated polyester fabrics  
 .....Thermal transfer coated nylon fabrics  
 .....Thermal transfer slit edge satins  
 .....Core 76mm/3"  
 .....Roll outer diameter 254mm (10") max

**Label sizes**  
 610/611/612 min .....16mm (5/8") W x 25mm (1") L  
 612 max .....45mm (1.75") W x 102mm (4") L  
 611 max (for stacking) .....51mm (2") W x 102mm (4") L  
 610 & 611 (no stacking) .....51mm (2") W x 203mm (8") L

**Print areas** .....To within 1.6mm (0.062") of the label edge.

**Print speed** .....4 ips (102mm/sec) or 2.5ips (64mm/sec)

**Print Resolution** .....300 dpi (12 dots/mm)

**Sensors** .....610/611 only - to register overprint to preprint

**Drivers** .....Paxar PCMate  
 .....MPCL

#### Graphics and Text

**Fonts** .....Standard, Reduced, Bold, OCR-A like,  
 .....CG Triumvirate, CG Triumvirate Bold  
 .....Four rotations  
 .....Upper and lower case  
 .....4 pt smallest  
**Font expansion** .....EFF Swiss font expandable 2x to 7x  
**Care symbols** .....ASTM, Ginetex

**Barcodes** .....EAN 8 and 13  
 .....UPC A and E  
 .....Interleaved 2 of 5  
 .....Extended Code 39  
 .....Code 128  
 .....Code 93

**Interface** .....Parallel, Serial RS232C

**Electrical** .....220V/50Hz, 115V/60Hz

**Dimensions** .....318mm (12.5") H x 305mm (12")  
 .....W x 330mm (13") D

**Weight** .....14kg/30lbs

**Mounting** .....Bench top

**Temperature** .....4°C (40°F) to 35°C (95°F)

**Humidity** .....5% to 90% non-condensing

**Options** .....Rewind unit

## Print basic care and logo labels economically

**Q:** Do you need basic fabric care labels printed in hours, not weeks?

Would you like to shrink inventory and cut obsolescence?

Are you looking for a cost effective way to print your basic care and logo labels?

**A:** Paxar 610/611/612 Care Label Printers

### Print on demand

In-plant printing puts you in charge of your label quantities, delivery times and design. In addition, the Paxar 610/611/612 printers offer a choice of label fabrics to suit your garments. Print your labels in-plant and you have the labels you want when you need them.

- Print variable information quickly and easily
- Meet urgent delivery criteria, rush jobs and top-ups
- Accommodate changes of information
- Cut costs and simplify inventory by only holding blank rolls of fabric stock and ink
- Consumables supplied in convenient, easy-to-use kits
- Reduce outsourcing costs by printing care labels in-house

These easy to use printers meet your needs for basic, one colour care and logo labels in low to medium volume situations. They provide affordable yet flexible solutions for in-plant label printing and enable you to combine all the required logo, care and content information on your labels. The Paxar 610 model prints on one side only and is our most basic model with no cutting facility, labels can be rewound with the optional Rewind Unit. The Paxar 611 also prints one side only and comes with an integrated heavy duty knife unit and small stacking tray. The Paxar 612 model prints two-sided labels and has the same heavy duty knife and small stacking tray.

These printers are all easy to operate with self-centring fabric and ink ribbons. Large supply rolls minimise downtime for reloading. All three printers ensure reliable performance and are simple to maintain with LCD displays for quick and easy troubleshooting.

- Paxar 610 - one side printing
- Paxar 611 - one side printing with knife and stacking tray
- Paxar 612 - two side printing with knife and stacking tray
- Thermal transfer
- Low to medium volume production 500,000 labels per year
- Print at 4 ips (102mm/sec) or 2.5 ips (64mm/sec) at 300 dpi (12 dots/mm)
- Print barcodes on coated fabrics
- 610 and 611 printers allow you to overprint rolled fabric graphics supplies which contain pre-printed, multi-colour logos and fixed text
- Fabrics and inks are quickly and easily loaded
- Fabrics and inks supplied in convenient kit form

### Optional

#### Rewind Unit

Rewinds printed labels onto rolls for off-line cut and sew operations

Overprint rolled fabric graphic supplies

### Applications

- ✓ Basic Care Labels
- ✓ Basic Logo Labels

### Why Paxar?

Paxar in-plant printers and software are tailored to the specific needs of apparel manufacturers. High speed processors make short work of data changes permitting frequent version changes. This means you stay up and running longer. We offer a total system complete with printers, media, inks, software and technical support - and we offer them globally.

### Data Management

Paxar offers solutions to take critical data from a host system and print it in the right place on a label anywhere in the world. Our web-based SpecStar™ In-Plant printing system receives data, manipulates it as necessary and distributes it to remote locations. Paxar PCMate Plus ticket and label printing software creates format layouts and manages your data for in-plant printing. The SpecStar system and PCMate Plus software together provide a seamless, global system for printing in any plant, anywhere in the world. Finally, you can programme printers in their native language for direction connection with mainframe systems.

### Supplies

For smooth and reliable performance, use Paxar supplies with Paxar in-plant printers. The printers are tuned for Paxar's fabric and ink ribbon combinations to make your products look their best and to reduce RTMs. Most products are available worldwide so your garments will be uniform in appearance regardless of where you manufacture the goods.

A range of fabrics are available, including economical nylons, mid-range polyesters and more luxurious pearlescent satins. Paxar offers fabric and ink combinations that are colourfast through home laundering, dry cleaning and steam pressing.

### Service

Global machine service means you never have to worry about your in-plant systems. We can install the printers and train your staff to operate the machines. Maintenance and service packages are available worldwide. No one else comes close to Paxar's reach and capabilities.
